ABOUT ME

Frontend and mobile developer with 7+ years of experience specializing in **React** and **React Native**.
I build responsive, scalable web and mobile applications using **React**, **Next.js**, and **Expo**, ensuring performance, maintainability, and great user experience.
I'm passionate about **clean code, UI precision, and efficient collaboration**, and I continuously sharpen my full-stack skills with **NestJS**, **GraphQL**, and modern backend integrations.

QUALIFICATIONS

- **Frontend Development:** 7+ years building scalable, production-ready web and mobile applications.
- **React & TypeScript:** Advanced experience using React (with Hooks), Context API, and TypeScript.
- **UI/UX Implementation:** Skilled in translating **Figma designs** and wireframes into **pixel-perfect**, responsive interfaces.
- **Reusable Components:** Builds and maintains reusable React components and libraries for scalability.
- **State Management:** Experience with Context API, Redux, and React Query for predictable and performant state flow.
- **Component Libraries:** Proficient with **Material UI**, **ShadCN/UI**, and custom component theming.
- **Collaboration:** Works effectively in Agile/Scrum teams, participates in code reviews, and provides constructive feedback.
- **Tools & Environment:** GitHub, Jira, Sentry, AWS Amplify, Expo, VS Code, and Claude Code.

WORK EXPERIENCE

Software Engineer   April 2025 - Present
Self Employed

- Developing a **cross-platform platform** enabling users to find jobs, hire workers, rent equipment, and purchase raw materials.
- Designed modular frontend architecture using **React Native** and **Expo**, with reusable UI components.
- Building internal web systems for SMEs, focusing on responsive design and frontend maintainability.
- Implemented efficient data fetching using React Query and secure data handling with expo-secure-store.

Software Engineer   October 2024 - March 2025
OAKTree Innovations

- Delivered **React-based web and mobile features** across iOS, Android, and web.
- Collaborated in Agile sprints, conducted **code reviews**, and contributed to UI/UX improvements.
- Translated **Figma mockups** into responsive, maintainable web components.
- Improved frontend performance through memoization and code-splitting techniques.

React Developer
OnCloud
July 2024 - October 2024

- Developed and maintained **React + TypeScript** web features aligned with design team specs.
- Built **reusable UI components** to accelerate feature delivery and maintain design consistency.
- Resolved layout and state management issues, improving product quality and test coverage.
- Collaborated with QA and designers to ensure pixel-perfect implementation and smooth UX.

React Native / Android Developer
Appetiser
May 2019 - June 2024

- Led development for multiple **cross-platform mobile apps** using React Native.
- Championed Agile practices and mentored junior developers on **clean architecture** and **best coding standards**.
- Authored **epics, user stories, and pull requests** to maintain structured development cycles.
- Ensured feature parity between Android and iOS apps and improved UI consistency.

React Native Developer
Cirqled
September 2018 - April 2019

- Built and deployed **React Native Expo apps** for both iOS and Android.
- Collaborated with web team on **React web frontend** features.
- Designed intuitive chat and group features emphasizing usability and responsiveness.

Android / React Native Developer
Symph
January 2015 - September 2018

- Developed Android and React Native apps for startups and enterprise clients.
- Designed scalable app architectures and implemented efficient API integrations.
- Contributed to company hackathons and provided mentorship for junior developers.

PROJECTS

Fraim
- Maintained a React Native app delivering personalized daily team updates.
- Integrated REST APIs and focused on **real-time performance** and scalability.

Exclusive Punt
- Built a cross-platform React Native app delivering live racing tips and data.
- Used TypeScript and custom hooks for efficient state management and clean code.

Asia Car Service
- Maintained a ride-hailing app with **GraphQL** and **REST** integrations.
- Improved secure data storage and optimized UI for diverse device compatibility.
